

ELECTRONIC SUSPENSION ELIMINATORS

Ref. **JP ESR 016**
JP ESR 017

OVERVIEW

The JETPRIME electronic suspension eliminators allows replacing the factory-equipped electronic suspension with classic suspension, eliminating the error lights on the dashboard.

These products are plug-and-play, no modification is required on the bike.

A specific eliminator is required for every suspension:

- **JP ESR 017** - front fork (only one eliminator is needed)
- **JP ESR 016** - rear shock absorber

Each eliminator can be installed individually, depending on which suspension is going to be replaced.

INSTALLATION

NOTE

Before installing the JETPRIME electronic suspension eliminators, it is essential to **disable dynamic suspension management** on the bike and set it to a **fixed value**, in every riding mode.

Refer to the manufacturer's user manual for instructions on how to properly configure the electronic suspension settings.

Failure to do so may cause excessive stress on the eliminators, potentially resulting in damage or malfunction.

1. set "Fixed Suspension" in every applicable setting, (depending on which suspension is going to be replaced, front, rear) in every riding mode
2. set the same value in every fixed suspension setting (e.g. Front Compression 1, Front rebound 1...)
3. turn off ignition and wait for the complete power-off (it takes about 1-2 minutes)
4. disconnect the electronic suspensions
5. connect the JETPRIME electronic suspension eliminators
6. turn on ignition and check for errors

NOTE

Secure the eliminators on the bike with cable ties.

JP ESR 016 and JP ESR 017 should be mounted in a location exposed to airflow, and away from heat sources.

Once the eliminators are installed, **DO NOT ADJUST** the suspension settings.
