

LEFT HANDLEBAR SWITCH

*Ref. **JP PS AP009 RF***

TECHNICAL FEATURES

- CNC-machined anodized aluminium body
- stronger and lighter than the original part
- IP69K protection
- laser engraving
- wired with RAYCHEM 105° cable and sealed with RAYCHEM S1125 resin

INSTALLATION

This product is plug-and-play, no modification is required on the bike:

1. make sure the ignition is turned off
2. disconnect and remove the original handlebar switch (refer to the manufacturer's workshop manual)
3. install the JETPRIME handlebar switch on the handlebar using the provided bolts, and tighten to 10 Nm
4. connect the wiring to the original connectors

NOTE

This handlebar switch is **NOT** compatible with the V4-MP multimedia platform.

FUNCTIONS

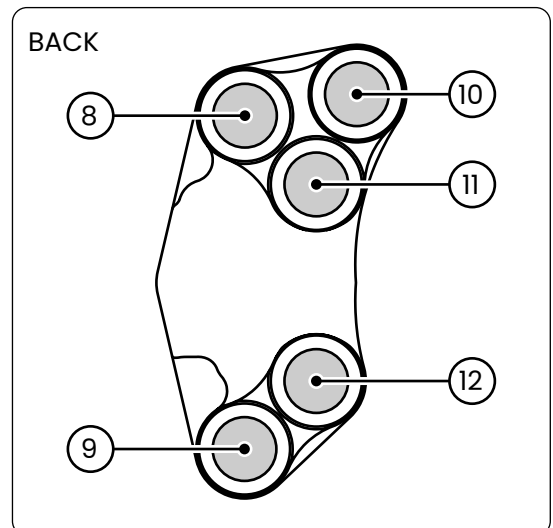

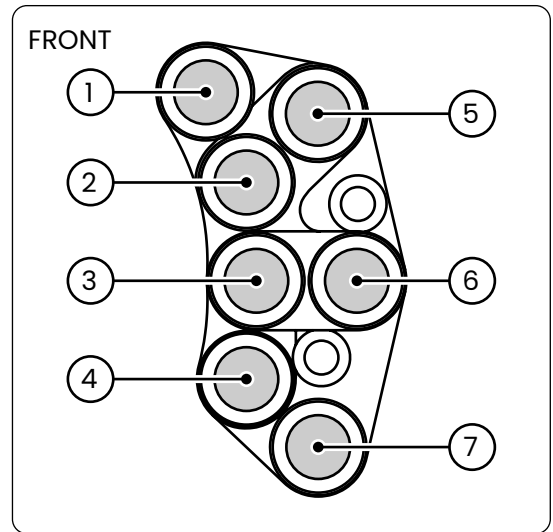

This handlebar switch can be used in both **STREET** and **RACING** modes. The mode selection is managed via the **MODE** button (5): when not pressed, the **STREET** mode is active; when pressed, the **RACING** mode is activated.
